

NEW ROLLER MAPLUSTEX

code MTO090RS

FEATURES:

The new MaplusTex abrasive fine roller, thanks to its abrasive microlamine, allows:

- to remove from ski sole the opacity which follows the use of a waxing iron utilized at too high temperatures;
- to eliminate micro-waves created when sliding on very abrasive or iced snow;
- polish ski sole after a new structuring with grinding machine;
- to remove residues of a very hard wax (as Maplus Artic Base solid).

USE TIPS:

- having a larger diameter than normal rotating brushes, **it must be used with minimum pressure at a maximum drill speed or 700/800 revolutions per minute (rpm);**
- **it is preferable to use it before preparing the edges,** in order to avoid round off the cusp;
- after using MaplusTex roller **it is recommended to thoroughly clean the base** with a specific liquid cleaner, as Maplus Clean, so to remove any residues.
